# Dong Ki Kim

77 Massachusetts Avenue, Room 31-232C, Cambridge, MA, 02139

□ (+1) 607-768-6696 | **Z** dkkim93@mit.edu | **A** dkkim93.github.io/ | **P** Dong-Ki Kim

## **Education**

#### **Massachusetts Institute of Technology**

Cambridge, MA

S.M. in Aeronautics and Astronautics

Graduated Jan. 2020

- · Focus: Reinforcement Learning
- · Advisor: Professor Jonathan P. How
- Cumulative GPA: 5.0 / 5.0

Cornell University Ithaca, NY

B.S. in Electrical and Computer Engineering

Graduated Jan. 2016

- Focus: Robot Perception
- Advisor: Professor Tsuhan Chen
- Highest Honors: Summa Cum Laude

## **Experience**.

#### Laboratory for Information and Decision Systems, MIT

Cambridge, MA

Graduate Researcher, Advisor: Professor Jonathan P. How

Sep. 2017 - Present

- Derived new meta-multiagent policy gradient theorem that provides most all-encompassing approach for agents to meta-learn about different sources of non-stationarity and enable fast adaptation with respect to simultaneously learning fellow agents [1].
- Developed peer-to-peer teaching frameworks for enabling agents to learn to teach or share knowledge in cooperative multiagent reinforcement learning settings [2, 3, 4, 11, 12].
- Built attention-based hierarchical reinforcement learning framework that identifies useful latent features across multiple sensory inputs and accelerates in transfer learning tasks [5, 13].
- Led demo preparation of package delivery using multiple drones for annual Boeing visit at MIT. Contributed to collision avoidance algorithm, on-board perception system for classification, and projection system for visualization. [Video]

#### Air Lab, CMU-Robotics Institute

Pittsburgh, PA

Research Intern, Advisor: Professor Sebastian Scherer

Aug. 2016 - Jul. 2017

- Developed deep multimodal network that improves segmentation robustness to appearance variations (e.g., Summer vs Winter) by combining image and LiDAR sensor data [6, 14].
- Built ROS-based system that estimates terrain roughness from 3D LiDAR sensor data in real-time. [Video]

#### Robot Intelligence through Perception Lab, TTIC

Chicago, IL

Research Intern, Advisor: Professor Matthew R. Walter

Jan. 2016 - Jul. 2016

- Developed cross-view localization system that estimates vehicle's pose on georeferenced satellite map given sequence of ground-level images [7].
- Improved LSD-SLAM's pose estimation by incorporating ORB-SLAM's pose-graph keyframe constraints.

#### Advanced Multimedia Processing Lab, Cornell University

Ithaca, NY

Undergraduate Researcher, Advisor: Professor Tsuhan Chen

May. 2014 - Jan. 2016

- Developed indoor localization algorithm based on floor plan and camera [8].
- Built vision-based system that enables drone to navigate indoors autonomously and find specific target [15].

## **Honor & Award**

#### **Outstanding Student Paper Award Honorable Mention for AAAI**

Jan. 2019

Sep. 2015

#### **Kwanjeong Education Foundation Scholarship**

Sep. 2017 - Present

Receiving \$30,000 / year for 4-5 years for graduate studies at MIT

## Merrill Presidential Scholar

Nominated for Cornell University's prestigious award given to top 1% graduating seniors

## Skill

Programming Language: Python, C/C++, Matlab

Tools/Library/Software: PyTorch, TensorFlow, Theano, Caffe, Keras, OpenCV, ROS, Point Cloud Library
